

Treatment Plan Overview

PCV REGIMEN

6 week cycles of chemo with Lomustine (CCNU) on day one, Procarbazine (PCB) days 8-21 and Vincristine (VCR) days 8 & 29. You'll have occasional bloodwork and MRIs. The amount of chemo cycles that you do may vary depending on your response.

CCNU Called: Lomustine or Gleostine

PCB Called: Procarbazine or Matulane

VCR Called: Vincristine, Marqibo or Vincasar PFS

 Surgery  Bloodwork  MRI
